EXTRA SPECIAL PECAN TREES PRUNED A YEAR IN ADVANCE OF RESETTING SAME

FOR LAWNS, YARDS, LANDSCAPING, PARKS, ROADSIDE
PLANTINGS, DRIVEWAYS AND ORCHARDS, WHERE
EARLY BEARING AND FAST GROWTH IS WANTED

Our Specially pruned and prepared Pecan Trees were selected by R. L. Odom, manager, out of bearing trees six years old that were over 12 feet high, well branched, and are from one inch to four inches in diameter (Caliper).

These trees have a very fine root system, plenty of lateral roots as well as tap roots. This root system being six years old and the trees pruned and prepared during the year ahead gives the trees a top with a growth that is vigorous and ready to start growing early in the spring and it will continue to grow right on through the year.

These specially prepared trees will start growing in the spring about three weeks earlier than large trees would start growth that are pruned at the time of resetting. This early start gives the trees a great advantage because they get well started before summer and will continue to grow all the year. This method almost entirely eliminates the danger of the trees dying from resetting.

The following letter written September 1, 1938, by Mr. S. W. Monroe, County Agricultural Agent of Jasper County, who is very deeply interested in the development of all East Texas, will be of interest to all Pecan growers:

“TO WHOM CONCERNED:

“I have observed the method of pruning pecan trees in the nursery by R. L. Odom who is president and manager of the Sabine Valley Pecan Nurseries and do not hesitate to recommend the method. It is a form of advanced pruning which permits the nursery trees to completely recuperate from the punishment of pruning for months before time to be reset in the fields.

“The method is calculated to reduce mortality rate of reset trees and to assure maximum growth the first year.

Respectfully,
S. W. Monroe,
Jasper County Agricultural Agent.”

Visitors are always welcome. Stop at the Entrance sign on Highway 63 (Lufkin Highway) six miles West of Jasper. Drive in the gate and back about 200 yards to the Office and Nursery. If you come through Jasper on Sunday call R. L. Odom, telephone 248-W and he will go out with you.

Prices for Extra Special Trees: 1 to 1½ inches, Caliper, \$4.00; 1½ to 2½ inches, \$6.00; 2½ to 4 inches, \$10.00 each, F. O. B. Jasper, Texas. Terms cash with order or one fourth cash with order and balance C. O. D.

Varieties are “Odom”, “Sabine”, “Stuart”, “Moneymaker” and “Success”.

We also have a fine line of Pecan trees in all sizes.
